# The **BUNDUCUBE**

**TO GET THE FULL BENEFIT OF YOUR GUARANTEES AND WARRANTIES PLEASE READ THE MANUAL IN ITS ENTIRETY**

The BunduCube is the latest product on offer from Bundutec – a Shower Cubicle/dressing room for your privacy needs.

It pitches with our signature Pro-Pitch technology, simply unzip the bag, roll down the canvas and by grasping the top rail just pull towards you to pitch it.

It has an additional frame in the bottom for extra rigidity so that the canvas doesn't blow against you in windy weather.

It also offers a 1.5 x 1.5m cube, to give additional space, making it one of the largest on the market.

It weighs in at 5.5kg, is made from Alias canvas – a high performance material which is UV treated – so no fading!

The BunduCube can mount to any roof rack – and its ease of use is a testament to the BunduTec brand's innovation.

There is a zip on one corner of the cube for easy access, and all the materials used in this design are high quality, durable and made to last!

## HOW TOS

### USING THE BUNDUCUBE:

It pitches with our signature Pro-Pitch technology, simply unzip the bag, roll down the canvas and by grasping the top rail just pull towards you to pitch it.

Simply overcam the mechanism for it to lock in place, offering full rigidity. At the bottom of the frame there will be flat bars inside the canvas, with velcro edges sticking out. Using your hand, simply stick the velcro edges together for a rigid frame at the bottom – now your structure is rigid and offers wind resistance – the canvas can't flap around in windy weather.

To put away the vube, simply follow the instructions in reverse – unvelcro the bottom edge, bend the top lock mechanisms inwards, and gripping the top bar firmly simply push toward your bag. The whole mechanism will fold away until it is flush with your vehicle.

Simply roll up the canvas, use the Velcro straps to secure it in place, and zip up your bag.

### FITTING THE BUNDUCUBE:

Simply line up the BunduCube with your Roofrack and mark the holes in the bracket. Simply drill through and bolt on with M6 Bolt & Nut. (The bolt & Nut does not come with your purchase)
